

## Prototype

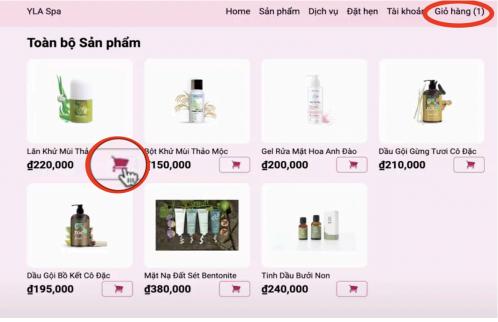

## **SPA-FRONT**

### **Purchasing Function**

Before clicking on the "Cart" icon button

After clicking on the shopping cart icon of the product the user wants to buy, the system will update the product number in the Shopping Cart section on the navbar.

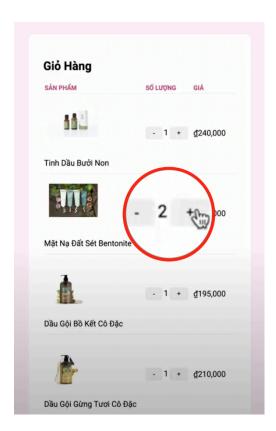

UNIVERSITY OF SCIENCE - VNUHCM

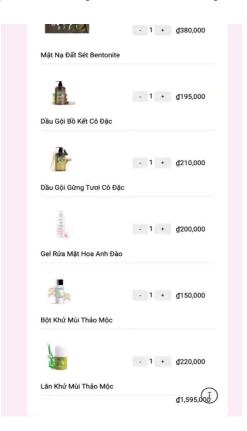

## **Shopping cart**

Show all products that have been put into the cart by the user and calculate the total price of the product. Besides, Users can add or remove product quantities and prices will also be updated.

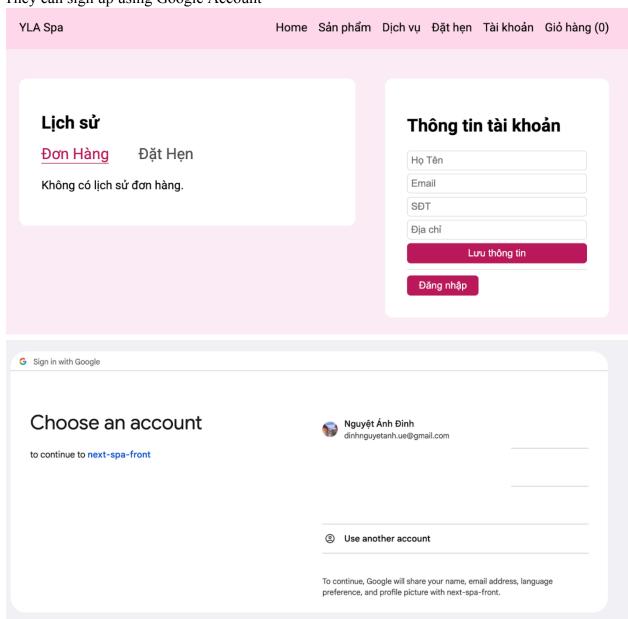

# **Account Page**

#### **Guest without an account:**

They can sign up using Google Account

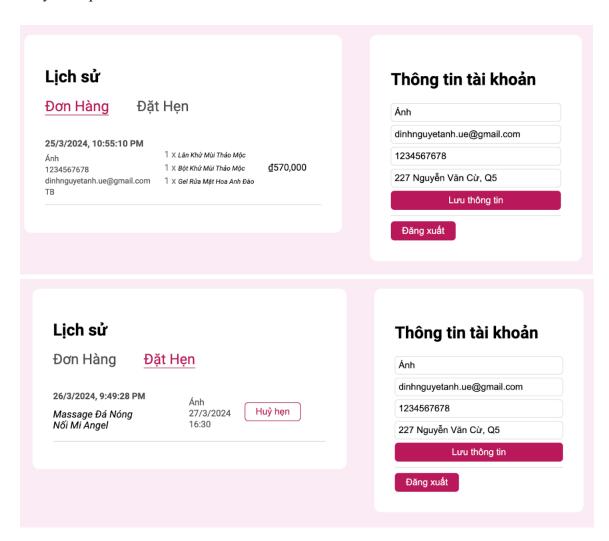

#### **User with an account:**

The system will show their order history and booking history, along with their info already filled. They can update their information.

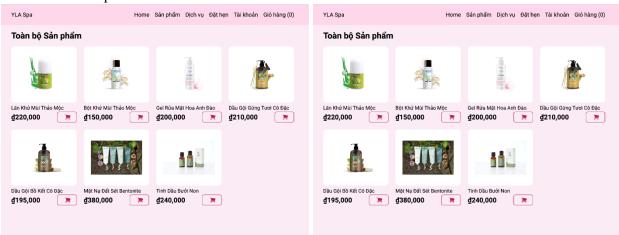

## All Products and Services Interface

User can see all products and services

They can also check those products or services individually

They can add the product into cart as shown above.

They can also Book appointments by clicking on "Đặt hẹn" button. Then, they will be directed to the booking page as shown in the next part. If they click on the Booking button for a specific service, the choice they choose will be kept and shown in the Booking page.

# **Service Booking Interface**

Users can browse available services and select one or more for booking. They can choose a date and time for their appointment.

The system restricts time slot selection based on the current time to ensure users can't book appointments in the past.

Case: If the user choose 26th (in the screenshot, the date is 26th and the time is 21:16, meaning it's no longer their working hour, resulting in no time slots available)

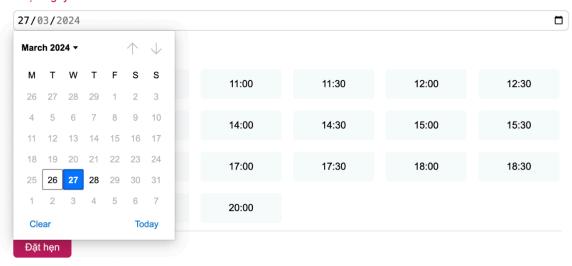

Users can only book an appointment within 2 days from the current time. Other dates are disabled.

#### Chon ngày

### **User Account Integration**

The system supports session management where logged-in users have their information (name, email, phone, etc.) pre-filled based on their account details, simplifying the booking process. Guests without accounts are required to fill in their information manually.

## Đặt hẹn dịch vụ spa

### Guest without an account

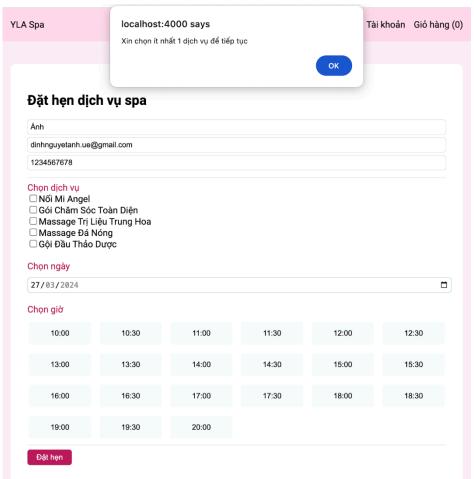

## **Multiple Service Booking**

Users can select multiple services

## Đặt hẹn dịch vụ spa

Ánh	
dinhnguyetanh.ue@gmail.com	
1234567678	
Chọn dịch vụ	
☑ Nối Mi Angel	
☐ Gói Chăm Sóc Toàn Diện	
☑ Massage Trị Liệu Trung Hoa	
☐ Massage Đá Nóng	
☑Gội Đầu Thảo Dược	

If users don't choose any service but proceed to click submit, then there will be an alert telling them to choose at least one service.

## **Booking success message**

Users receive a confirmation message. There's also functionality for users to book additional appointments.

When they click on that button, they will be directed to the Booking page with previously filled fields erased.

## See Booking History - Cancel Booking

After the user is done with booking, they can check their booking status/history in their Account page. They can cancel their appointment if it has not been confirmed by the spa.

Once the appointment has been confirmed or rejected by the spa, the status will be shown.
